PROFILE SUMMARY

Dedicated Python developer with a keen problem-solving mindset and a passion for technology. Excited to leverage technical skills and fresh perspectives to contribute effectively to the tech industry.

EDUCATION

St Pauls Pre University College

Computer Science with PCM, GPA: 7.78

Belgaum, Karnataka

July 2020 - June 2022

Vanita Vidyalaya

10th class - State Board - GPA: 7.48

Belgaum, Karnataka

2020

TECHNICAL SKILLS

Programming Languages: Python, Java, SQL, HTML, CSS

Technologies: Flask, Bootstrap, SQLAlchemy, Restful API, Scikit learn, Postman, Selenium, SQLite

Soft Skills: Problem-solving, Adaptability, Time management, Teamwork

EXPERIENCE

Green Infra

Data Analyst

June 2021 - June 2022

Ahmedabad, Gujarat

- Leveraged data analytics to evaluate marketing performance and gain insights into data analysis.
- Managed and executed data-driven initiatives, resulting in enhanced campaign outcomes and increased engagement.
- Generated insights to guide marketing strategies and identify trends.

PROJECTS

Blog Website 🔗 | Python, Flask, SQLAlchemy, HTML, CSS, Bootstrap, SQLite

- Developed a dynamic blog website using Python, Flask, and Bootstrap, with HTML and CSS for responsive design.
- Implemented user authentication and registration, allowing users to view, comment on blogs, and interact with content.
- Integrated SQLite database with SQLAlchemy for data management, enabling admin functionalities such as creating, editing, and deleting posts.

Data Entry Bot 🔗 | Python, BeautifulSoup, Selenium, API

- Developed a data entry bot using Python, BeautifulSoup, Selenium, and APIs to scrape tenant information, including name, URL, price, and location from a website.
- Implemented automated data extraction and form submission to Google Forms, streamlining data collection and entry processes.
- Integrated data with Excel sheet storage, ensuring organized and accessible records for further analysis and reporting.

Cafe & WiFi 🔗 | Python, Flask, Postman, RESTful API, SQLAlchemy, HTML, SQLite

- Developed a web application using Python, SQLAlchemy, SQLite, and HTML for managing café information, including adding, updating, and deleting records.
- Created and tested a RESTful API with Postman to interact with the application, allowing seamless integration and data manipulation.
- Published comprehensive API documentation to facilitate user understanding and ensure effective use of the API.

ACHIEVEMENTS

- **Udemy**: 100 Days of Code - Python Pro Bootcamp
- **BCG X (Forage)**: Data Science Job Simulation
- **Infosys - SpringBoard**: Data Structures and Algorithms with Python
- **LeetCode**: Solved over 100+ DSA problems
